Wreck of the Titanic

The wreck of British ocean liner RMS Titanic lies at a depth of about 12,500 feet (3,800 metres; 2,100 fathoms), about 325 nautical miles (600 kilometres) south-southeast off the coast of Newfoundland. It lies in two main pieces about 2,000 feet (600 m) apart. The bow is still recognisable with many preserved interiors, despite deterioration and damage sustained by hitting the sea floor; in contrast, the stern is heavily damaged. The debris field around the wreck contains hundreds of thousands of items spilled from the ship as she sank.

The Titanic sank on April 15, 1912, following her collision with an iceberg during her maiden voyage. Numerous expeditions unsuccessfully tried using sonar to map the seabed in the hope of finding the wreckage. In 1985, the wreck was located by a joint French–American expedition led by Jean-Louis Michel of IFREMER and Robert Ballard of the Woods Hole Oceanographic Institution, originally on a mission to find two nuclear Cold War submarines. The wreck has been the focus of intense interest and has been visited by numerous tourist and scientific expeditions, including by the submersible Titan, which imploded near the wreck in June 2023, killing all five aboard.

Controversial salvage operations have recovered thousands of items, many of which have been conserved and put on public display. Many schemes have been proposed to raise the wreck, including filling it with ping-pong balls, injecting it with 180,000 tons of Vaseline, or using half a million tons of liquid nitrogen to encase it in an iceberg that would float to the surface. However, the wreck is too fragile to be raised and is protected by a UNESCO convention.

Uncharted is a 2022 American action adventure film based on the video game franchise developed by Naughty Dog and published by Sony Interactive Entertainment. Directed by Ruben Fleischer from a

screenplay by Rafe Lee Judkins, Art Marcum, and Matt Holloway, it stars Tom Holland as Nathan Drake and Mark Wahlberg as Victor Sullivan, with Sophia Ali, Tati Gabrielle (in her debut film appearance), and Antonio Banderas starring in supporting roles. In the film, Drake is recruited by Sullivan in a race against corrupt billionaire Santiago Moncada (Banderas) and mercenary leader Jo Braddock (Gabrielle) to locate the fabled treasure of the Magellan expedition.

The film entered development in 2008, with producer Avi Arad stating that he would be working with Sony Pictures to develop a film adaptation of the video game franchise. It was then in development hell with various directors, screenwriters, and lead cast members attached at various points. Filmmakers David O. Russell, Neil Burger, Seth Gordon, Dan Trachtenberg, Shawn Levy, and Travis Knight were initially signed to direct, while Wahlberg was set to play Drake in early development. Holland was cast as Drake in May 2017, and Fleischer was hired as director in early 2020. Filming began in March 2020, but was halted by the COVID-19 pandemic. It resumed in July and finished in October, with locations including Boston, Barcelona, New York City, and Kiamba.

Originally set to be released on December 18, 2020, the film faced major delays due to the COVID-19 pandemic. It eventually premiered at the Coliseum in Barcelona on February 7, 2022, and was released in the United States on February 18 by Columbia Pictures (via Sony Pictures Releasing). The film received mixed reviews from critics, but was a commercial success, grossing \$407.1 million worldwide against a \$120 million budget, making it the fourth-highest-grossing video game film at the time of release. A sequel is in development.

Mystery Science Theater 3000

launched projects similarly on riffing on films, including The Film Crew, RiffTrax, and Cinematic Titanic. MST3K also brought to light several older movies that

Mystery Science Theater 3000 (abbreviated as MST3K) is an American science fiction comedy television series created by Joel Hodgson. The show premiered on KTMA-TV (now WUCW) in Saint Paul, Minnesota, on November 24, 1988. It then moved to nationwide broadcast, first on The Comedy Channel for two seasons, then Comedy Central for five seasons until its cancellation in 1996. Thereafter, it was picked up by The Sci-Fi Channel and aired for three more seasons until another cancellation in August 1999. A 60-episode syndication package titled The Mystery Science Theater Hour was produced in 1993 and broadcast on Comedy Central and syndicated to TV stations in 1995.

In 2015, Hodgson led a crowdfunded revival of the series with 14 episodes in its eleventh season, first released on Netflix on April 14, 2017, with another six-episode season following on November 22, 2018. A second successful crowdfunding effort in 2021 produced 13 additional episodes shown on the Gizmoplex, an online platform that Hodgson developed which launched in March 2022. As of 2023, 230 episodes and a feature film had been produced as well as three live tours.

The show initially starred Hodgson as Joel Robinson, a janitor trapped by two mad scientists ("The Mads") on the Earth-orbiting Satellite of Love and forced to watch a series of B movies to monitor his reaction to them. To keep his sanity, Joel crafts sentient robot companions, including Tom Servo, Crow T. Robot, Cambot and Gypsy, to keep him company and help him humorously comment on each movie as it plays, a process known as riffing. Each two-hour episode would feature a single movie (often edited for time constraints), sometimes preceded by various old shorts and educational films, with Joel, Tom, and Crow watching in silhouette from a row of theater seats at the bottom of the screen. These "theater segments" were framed with interstitial sketches called "host segments". The show's cast changed over its duration; most notably, the character of Joel was replaced by Mike Nelson (played by Michael J. Nelson) halfway through the show's fifth season. Other cast members, most of whom were also writers for the show, include Trace Beaulieu, Josh Weinstein, Jim Mallon, Kevin Murphy, Frank Conniff, Mary Jo Pehl, Bill Corbett, Paul Chaplin, and Bridget Jones Nelson. The 2017 revival features a primarily new cast, including Jonah Ray who

plays the new human test subject Jonah Heston, along with Felicia Day and Patton Oswalt as "The Mads" and Baron Vaughn, Hampton Yount, and Rebecca Hanson voicing Tom Servo, Crow T. Robot, and Gypsy, respectively. Season 13 brought back this cast while integrating Emily Connor, played by Emily Marsh, and others from the live tours in this era.

Initially MST3K did not garner high viewership numbers, but the show's popularity spread through online word-of-mouth by its fans known as "MSTies" or "Mysties" (who would remind others to "Keep circulating the tapes"), frequent repeats, syndication, and home media offerings produced by Rhino Entertainment. Currently, this popularity continues through Shout! Studios, who along with Hodgson, now own the rights to the show and supported the revived series. MST3K was listed as one of Time magazine's "100 Best TV Shows of All-TIME" in 2007, and TV Guide has noted MST3K as one of the top cult television shows. The show won a Peabody Award in 1993, was also nominated for two Emmy Awards in 1994 and 1995, and for the CableACE Award from 1992 to 1997. The show was considered highly influential, contributing towards the practice of social television, and former cast members launched projects similarly on riffing on films, including The Film Crew, RiffTrax, and Cinematic Titanic. MST3K also brought to light several older movies that had fallen into obscurity or had received little or no public attention when originally released. Many of these films were subsequently identified as among the worst movies ever made, most notably Manos: The Hands of Fate.

with the supernatural, which prompts them to become hunters. While hunters, by their nature, operate off-the-grid, there are, nevertheless, hunter communities

Supernatural is an American television drama series created by writer and producer Eric Kripke. It was initially broadcast by The WB network from September 13, 2005, but after the first season, the WB and UPN networks merged to form The CW network, which was the final broadcaster for the show in the United States by the series' conclusion on November 19, 2020, with 327 episodes aired. The Winchesters, a spin-off prequel/sequel series to Supernatural developed by Robbie Thompson, Jensen Ackles and Danneel Ackles, aired on The CW for 13 episodes from October 11, 2022, to March 7, 2023.

Supernatural and The Winchesters each feature two main characters, Sam Winchester (played by Jared Padalecki) and Dean Winchester (played by Jensen Ackles), and Mary Campbell (played by Meg Donnelly) and John Winchester (played by Drake Rodger).

In Supernatural, the two Winchester brothers are hunters who travel across the United States, mainly to the Midwest, in a black 1967 Chevy Impala to hunt demons, werewolves, vampires, ghosts, witches, and other supernatural creatures. Supernatural chronicles the relationship between the brothers, their friends, and their father. Throughout the seasons, the brothers work to fight evil, keep each other alive, and avenge those they have lost. In The Winchesters, Dean Winchester narrates the story of how his parents John Winchester and Mary Campbell met, fell in love and fought monsters together while in search for their missing fathers.

Supernatural features many recurring guests that help Sam Winchester and Dean Winchester with their hunts and quests. Frequent returning characters include hunter Bobby Singer (who becomes a father figure to Sam and Dean after season two), Castiel (an angel), Crowley (a demon and the King of Hell), and Jack Kline (the Nephilim). The series also featured recurring appearances from other angels, demons, and hunters.
