

Will China Dominate The 21st Century

Chinese Century

The Chinese Century (simplified Chinese: 中国世纪; traditional Chinese: 中國世紀; pinyin: Zhōngguó shìjì) is a neologism suggesting that the 21st century may

The Chinese Century (simplified Chinese: 中国世纪; traditional Chinese: 中國世紀; pinyin: Zhōngguó shìjì) is a neologism suggesting that the 21st century may be geoeconomically or geopolitically dominated by the People's Republic of China, similar to how the "American Century" refers to the 20th century and the "British Century" to the 19th. The phrase is used particularly in association with the idea that the economy of China may overtake the economy of the United States to be the largest in the world. A similar term is China's rise or rise of China (simplified Chinese: 中国崛起; traditional Chinese: 中國崛起; pinyin: Zhōngguó juéqǐ).

China created the Belt and Road Initiative, which according to analysts has been a geostrategic effort to take a larger role in global affairs and challenges American postwar hegemony. It has also been argued that China co-founded the Asian Infrastructure Investment Bank and New Development Bank to compete with the World Bank and the International Monetary Fund in development finance. In 2015, China launched the Made in China 2025 strategic plan to further develop its manufacturing sector. There have been debates on the effectiveness and practicality of these programs in promoting China's global status.

China's emergence as a global economic power is tied to its large working population. However, the population in China is aging faster than almost any other country in history. Current demographic trends could hinder economic growth, create challenging social problems, and limit China's capabilities to act as a new global hegemon. China's primarily debt-driven economic growth also creates concerns for substantial credit default risks and a potential financial crisis.

According to The Economist, on a purchasing-power-parity (PPP) basis, the Chinese economy became the world's largest in 2013. On a foreign exchange rate basis, some estimates in 2020 and early 2021 have determined that China could overtake the U.S. in 2028, or 2026 if the Chinese currency further strengthened. As of July 2021, Bloomberg L.P. analysts estimated that China may either overtake the U.S. to become the world's biggest economy in the 2030s or never be able to reach such a goal. Some scholars believe that China's rise has peaked and that an impending stagnation or decline may follow.

21st century

The 21st century is the current century in the Anno Domini or Common Era, in accordance with the Gregorian calendar. It began on 1 January 2001, and will

The 21st century is the current century in the Anno Domini or Common Era, in accordance with the Gregorian calendar. It began on 1 January 2001, and will end on 31 December 2100. It is the first century of the 3rd millennium.

The rise of a global economy and Third World consumerism marked the beginning of the century, along with increased private enterprise and deepening concern over terrorism after the September 11 attacks in 2001. The NATO intervention in Afghanistan and the United States-led coalition intervention in Iraq in the early 2000s, as well as the overthrow of several regimes during the Arab Spring in the early 2010s, led to mixed outcomes in the Arab world, resulting in several civil wars and political instability. The early 2020s saw an increase in wars across the world, as seen with conflicts such as the Russian invasion of Ukraine and the Gaza war. Meanwhile, the war on drugs continues, with the focus primarily on Mexico and the rest of Latin America. The United States has remained the sole global superpower, while China is now considered to be an

emerging superpower.

In 2022, 45% of the world's population lived in "some form of democracy", although only 8% lived in "full democracies". The United Nations estimates that by 2050, two-thirds of the world's population will be urbanized.

The world economy expanded at high rates from \$42 trillion in 2000 to \$101 trillion in 2022, and though many economies rose at greater levels, some gradually contracted. Effects of global warming and rising sea levels exacerbated the ecological crises, with eight islands disappearing between 2007 and 2014.

In late 2019, the COVID-19 pandemic began to rapidly spread worldwide, causing more than seven million reported deaths, and around 18.2 to 33.5 million estimated deaths, while at the same time, causing severe global economic disruption, including the largest global recession since the Great Depression in the 1930s. The pandemic defined 2020 and 2021, and remained a global health crisis until May 2023.

Due to the sudden proliferation of internet-accessible mobile devices, such as smartphones becoming ubiquitous worldwide beginning in the early 2010s, more than two-thirds of the world's population obtained access to the Internet by 2023. After the success of the Human Genome Project, DNA sequencing services became available and affordable. There were significant improvements in the complexity of artificial intelligence, with American companies, universities, and research labs pioneering advances in the field. Research into outer space greatly accelerated in the 2020s, with the United States mainly dominating space exploration, including the James Webb Space Telescope, Ingenuity helicopter, Lunar Gateway, and Artemis program.

Acquisition of 21st Century Fox by Disney

the deal, were spun off into a new company called Fox Corporation on March 19, 2019 (a day before the acquisition was completed). Other 21st Century Fox

The acquisition of Twenty-First Century Fox, Inc. by The Walt Disney Company was announced on December 14, 2017, and was completed on March 20, 2019. Among other key assets, the acquisition included the 20th Century Fox film and television studios, U.S. cable channels such as FX, Fox Networks Group, a 73% stake in National Geographic Partners, Indian television broadcaster Star India, and a 30% stake in Hulu. Most remaining assets (including the Fox Broadcasting Company, Fox Television Stations, Fox News Channel, Fox Business, Fox Sports 1 and 2, Fox Deportes, and the Big Ten Network), which were excluded from the deal, were spun off into a new company called Fox Corporation on March 19, 2019 (a day before the acquisition was completed). Other 21st Century Fox assets such as the Fox Sports Networks and Sky were divested and sold off to Sinclair and Comcast, respectively.

21st century genocides

parliament condemned the "genocide of the Chechen people" during the First and Second Chechen War. Since the turn of the 21st century, 62,000 Nigerian Christians

Genocide is the intentional destruction of a people in whole or in part. The term was coined in 1944 by Raphael Lemkin. It is defined in Article 2 of the Convention on the Prevention and Punishment of the Crime of Genocide (CPPCG) of 1948 as "any of the following acts committed with intent to destroy, in whole or in part, a national, ethnical, racial, or religious group, as such: killing members of the group; causing serious bodily or mental harm to members of the group; deliberately inflicting on the group's conditions of life, calculated to bring about its physical destruction in whole or in part; imposing measures intended to prevent births within the group; [and] forcibly transferring children of the group to another group."

The preamble to the CPPCG states that "genocide is a crime under international law, contrary to the spirit and aims of the United Nations and condemned by the civilized world", and it also states that "at all periods of

history genocide has inflicted great losses on humanity." Genocide is widely considered to be the epitome of human evil, and has been referred to as the "crime of crimes". The Political Instability Task Force estimated that 43 genocides occurred between 1956 and 2016, resulting in 50 million deaths. The UNHCR estimated that a further 50 million had been displaced by such episodes of violence.

Capital in the Twenty-First Century

election, that those with property will dominate the twenty-first century political economy and set in motion forces to keep the rate of profit high enough to

Capital in the Twenty-First Century (French: *Le Capital au XXI^e siècle*) is a book written by French economist Thomas Piketty. It focuses on wealth and income inequality in Europe and the United States since the 18th century. It was first published in French (as *Le Capital au XXI^e siècle*) in August 2013; an English translation by Arthur Goldhammer followed in April 2014.

The book's central thesis is that when the rate of return on capital (r) is greater than the rate of economic growth (g) over the long term, the result is concentration of wealth, and this unequal distribution of wealth causes social and economic instability. Piketty proposes a global system of progressive wealth taxes to help reduce inequality and avoid the vast majority of wealth coming under the control of a tiny minority.

At the end of 2014, Piketty released a paper where he stated that he does not consider the relationship between the rate of return on capital and the rate of economic growth as the only or primary tool for considering changes in income and wealth inequality. He also noted that $r > g$ is not a useful tool for the discussion of rising inequality of labor income.

On May 18, 2014, the English edition reached number one on The New York Times Best Seller list for best selling hardcover nonfiction and became the greatest sales success ever of academic publisher Harvard University Press. As of January 2015, the book had sold 1.5 million copies in French, English, German, Chinese, and Spanish. The book is a worldwide success, with over 2.5 million copies sold by the end of 2017.

The book was adapted into a feature documentary film, directed by New Zealand filmmaker Justin Pemberton, and released in 2020.

Indian Century

The Indian Century is a neologism suggesting that the 21st century may be dominated by India, as the 20th century is often called the American Century

The Indian Century is a neologism suggesting that the 21st century may be dominated by India, as the 20th century is often called the American Century, and the 19th century British Century. The phrase is particularly used in the assertion that India's economy could overtake the economies of the United States and the economy of China as the largest national economy in the world, a position it historically held from the 1st to the 18th century CE.

The Next 100 Years: A Forecast for the 21st Century

predicts that the United States will remain the dominant global superpower throughout the 21st century and that the history of the 21st century will consist

The Next 100 Years is a 2009 speculative nonfiction book by George Friedman. In the book, Friedman attempts to predict the major geopolitical events and trends of the 21st century. Friedman also speculates in the book on changes in technology and culture that may take place during this period.

Timeline of Japanese history

Published in the 21st century Ian Preston, ed. (2001). "Japan". Political Chronology of Central, South and East Asia. Political Chronologies of the World. Europa

This is a timeline of Japanese history, comprising important legal, territorial and cultural changes and political events in Japan and its predecessor states. To read about the background to these events, see History of Japan.

Taiwan

(2006), China and the Taiwan Issue: Impending War at Taiwan Strait, University Press of America Wills, John E. Jr. (2006). "The Seventeenth-century Transformation:

Taiwan, officially the Republic of China (ROC), is a country in East Asia. The main island of Taiwan, also known as Formosa, lies between the East and South China Seas in the northwestern Pacific Ocean, with the People's Republic of China (PRC) to the northwest, Japan to the northeast, and the Philippines to the south. It has an area of 35,808 square kilometres (13,826 square miles), with mountain ranges dominating the eastern two-thirds and plains in the western third, where its highly urbanized population is concentrated. The combined territories under ROC control consist of 168 islands in total covering 36,193 square kilometres (13,974 square miles). The largest metropolitan area is formed by Taipei (the capital), New Taipei City, and Keelung. With around 23.9 million inhabitants, Taiwan is among the most densely populated countries.

Taiwan has been settled for at least 25,000 years. Ancestors of Taiwanese indigenous peoples settled the island around 6,000 years ago. In the 17th century, large-scale Han Chinese immigration began under Dutch colonial rule and continued under the Kingdom of Tungning, the first predominantly Han Chinese state in Taiwanese history. The island was annexed in 1683 by the Qing dynasty and ceded to the Empire of Japan in 1895. The Republic of China, which had overthrown the Qing in 1912 under the leadership of Sun Yat-sen, assumed control following the surrender of Japan in World War II. But with the loss of mainland China to the Communists in the Chinese Civil War, the government moved to Taiwan in 1949 under the Kuomintang (KMT).

From the early 1960s, Taiwan saw rapid economic growth and industrialization known as the "Taiwan Miracle". In the late 1980s and early 1990s, the ROC transitioned from a one-party state under martial law to a multi-party democracy, with democratically elected presidents beginning in 1996. Taiwan's export-oriented economy is the 21st-largest in the world by nominal GDP and the 20th-largest by PPP measures, with a focus on steel, machinery, electronics, and chemicals manufacturing. Taiwan is a developed country. It is ranked highly in terms of civil liberties, healthcare, and human development.

The political status of Taiwan is contentious. Despite being a founding member, the ROC no longer represents China as a member of the United Nations after UN members voted in 1971 to recognize the PRC instead. The ROC maintained its claim to be the sole legitimate representative of China and its territory until 1991, when it ceased to regard the Chinese Communist Party as a rebellious group and acknowledged its control over mainland China. Taiwan is claimed by the PRC, which refuses to establish diplomatic relations with countries that recognise the ROC. Taiwan maintains official diplomatic relations with 11 out of 193 UN member states and the Holy See. Many others maintain unofficial diplomatic ties through representative offices and institutions that function as de facto embassies and consulates. International organizations in which the PRC participates either refuse to grant membership to Taiwan or allow it to participate on a non-state basis. Domestically, the major political contention is between the Pan-Blue Coalition, who favors eventual Chinese unification under the ROC and promoting a pan-Chinese identity, contrasted with the Pan-Green Coalition, which favors eventual Taiwanese independence and promoting a Taiwanese identity; in the 21st century, both sides have moderated their positions to broaden their appeal.
